VIRGINIA MINERALS

Vol. 4 JULY 1958 copy 1 No. 3

A quarterly designed to acquaint the public with the mineral resources and activities of Virginia, and to furnish information on market quotations, new discoveries and developments, and pertinent publications. Distributed free upon request to the Division of Mineral Resources.

DIRECTORY OF ROCK AND MINERAL PRODUCERS

Introduction

This is a directory of the rock and mineral producers in Virginia, exclusive of the producers of the mineral fuels--coal, oil, and gas. Although we believe this directory is complete, any corrections or additions brought to the attention of the Division of Mineral Resources will be appreciated. The data in this directory are taken from the files of the Division and from information furnished by rock and mineral producers in the State. The assistance of these producers in the collection of data for this directory is gratefully acknowledged.

The producers are listed alphabetically under the raw material that is mined or the commodity produced. The location of the pit, mine, or quarry is given with respect to county and nearest town. If a producer operates more than one pit, mine, or quarry, the location of each operation is listed.
