**REPORT OF THE BOARD
FINDINGS AND ORDER**

1. Hearing Date and Place: This matter came for final hearing before the Virginia Gas and Oil board (hereafter "Board") at 9:00 a.m. on **September 16, 2014** at the at the Russell County Conference Center, Lebanon, Virginia.

2. Appearances: **Mark A. Swartz**, Esquire, of the firm of Swartz Law Offices, PLLC, appeared for the Applicant; and Paul Kugleman, Jr., Assistant Attorney General was present to advise the Board.

3. Jurisdiction and Notice: Pursuant to sections 45.1-361.1 *et seq.*, Virginia Code, as amended, the Board finds that it has jurisdiction over the subject matter. Based upon the evidence presented by the Applicant, the Board also finds that the Applicant has (1) exercised due diligence in conducting a meaningful search of reasonably available sources to determine the identity and whereabouts of each gas and oil owner, coal owner, or mineral owner, or in the case of conflicting claims to the ownership of the coalbed methane gas, each person identified by Applicant as a potential owner of the coalbed methane gas underlying the area described at paragraph 7.h below and in **Exhibit A1** attached hereto; and (2) has given notice to all parties so identified (hereinafter sometimes "person(s)" whether referring to individuals, corporations, partnerships,

associations, companies, businesses, trusts, joint ventures or other legal entities) and entitled by §§ 45.1-361.19 and 45.1-361.20, Virginia Code, as amended, to notice of this Application, and (3) that the persons listed in the Notice of Hearing are the persons so identified by the Applicant. Further, the Board has caused notice of this hearing to be published as required by § 45.1-361.19.B., Virginia Code, as amended. Whereupon, the Board hereby finds that the notices given satisfy all statutory requirements, Board rule requirements and the minimum standards of State due process.

4. Amendments and Dismissals: None.

5. Relief Requested: (1) Modification of the Oakwood I Coalbed Gas Field Rules to allow more than one coalbed methane gas well to be drilled within each of the Oakwood Field Drilling Units identified above and in **Exhibit A1** attached hereto; and (2) for an administrative order providing that additional well permits may be issued in the Oakwood I Field after this Application is filed and while it is pending.

6. Relief Granted: Available data and the evidence adduced at the hearing support Applicant's position that the production from the pool underlying the Oakwood I Coalbed Gas Field Drilling Units in question would be enhanced and benefit from in-field drilling; accordingly,

a. With regard to the Drilling Units described above and in **Exhibit A1** hereto, OGCB 3-90 is hereby amended to allow the Board's Designated Unit Operator in Drilling Units pooled by Board Order and the Well Operator/Permittee in voluntary Drilling Units to drill a total of two wells, said total to include any previously permitted wells, within the units affected by the Application and this Order;

b. In the event that an additional coalbed methane gas well(s) permitted and drilled after the entry of this order is located within the drilling window(s) of an Oakwood I Coalbed Gas Field Drilling Unit affected by this order, the production therefrom shall be solely attributed to and allocated to the Oakwood I Coalbed Gas Field Drilling Unit within which the wells are located. Such well(s) will be subject to any existing pooling orders, and no further Board appearance or action will be required;

c. In the event a second well is proposed that is to be located outside the drilling window of any Oakwood I Coalbed Gas Field Unit affected by this order and a permit application is submitted to the Division of Gas and Oil seeking such location exception, the Inspector shall assess the permit as follows:

(i) If an 80-acre square with the proposed well at its center lies entirely within Oakwood I Drilling Units which are voluntary in nature and are not subject to existing pooling orders, the Inspector may grant or deny the location exception on a case-by-case basis

according to standard procedures and provisions of the Oakwood I Field Order which allow wells to be drilled outside drilling windows; or

(ii) If an 80-acre square with the proposed well at its center lies entirely or partially within any Oakwood I Drilling Unit(s) which is subject to existing pooling orders, the Inspector shall refer the permit application to the Board for its recommendations concerning correlative rights considerations, modification of pooling orders, and escrow provisions. Alternatively, the Unit Operator may present a pooling proposal directly to the Board prior to filing a permit application. No permit under this paragraph ii. shall be issued until the Board has acted on the matter.

7. Special Findings:

- a. Applicant's proposed field rule modification is not an unreasonable or arbitrary exercise of the owner's right to explore for or produce gas;
- b. The Applicant's proposal would not unreasonably interfere with the present or future mining of coal or other minerals;
- c. The acreage to be embraced in the Drilling Units affected by and/or created by this Modification Order shall be as set forth above and in **Exhibit A1** attached hereto.
- d. The formations subject to this Modification Order are described in OGCB 3-90, as amended.
- e. The boundaries of the 80-acre Drilling Units are the same as heretofore established by OGCB 3-90, as amended.
- f. Unit Operator's production simulations indicate that drilling of an additional well in each Unit could facilitate the recovery of an additional 250,000 MCF of gas per Unit within 10 years of drilling.
- g. The boundaries of any 80-acre Drilling Units created subsequent to this Modification Order shall be according to paragraph 6.c.ii. above and as defined by Board action specific to individual units.
- h. The acreage subject to this Modification Order is depicted in **Exhibit A1** hereto and is more specifically described as follows:

Unit H27

Beginning at a point, Virginia State Plane NAD 27 coordinate of N:353622.410 E993682.260 feet to a point; S:87°51'45" E 1867.27 feet to a point; S:02°06'18" W 1870.76 feet to a point; S:87°51'40" E 1867.35 feet to a point; S:02°06'27" W 1870.71 feet to a point of beginning, containing +/- **80.00** acres.

Unit H28

Beginning at a point, Virginia State Plane NAD 27 coordinate of N:353552.770 E995548.220 feet to a point; N87°51'45" W 1866.78 feet to a point; N02°06'11" E 1870.81 feet to a point; S87°51'40" E 1866.84 feet to a point; S02°06'18" W 1870.76 feet to a point of beginning, containing +/- **80.00** acres.

i. Having considered the evidence presented, the Board found no reason to establish any allowable production rates for the wells contemplated by this Modification Order;

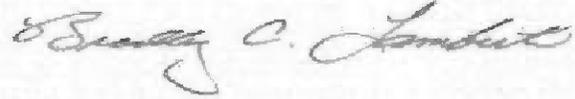

j. Except as herein specifically modified, the proposed Drilling Units more fully described above and in **Exhibit A1** attached hereto shall be developed and produced in compliance with OGCB 3-90, as amended.

k. This Modification Order shall be effective as of the date of the hearing, to-wit: **September 16, 2014**.

8. Conclusion: The relief granted hereby will assist in enhancing production from existing wells, will assist in more efficiently recovering coalbed methane gas from the area in question, will prevent waste, and will continue to protect the correlative rights of all owners and claimants. Therefore, the relief and all terms and provisions set forth above be and are hereby granted and IT IS SO ORDERED.
