

CLEAN ENERGY VIRGINIA

A WEBINAR SERIES

The *Clean Energy Virginia Five-Part Webinar Series* was hosted by Governor Ralph Northam’s Office and the Virginia Department of Mines, Minerals and Energy (DMME). The series focused on recent legislation that creates advantages for clean energy businesses to expand or locate in Virginia. Recordings and slide presentations for the events are below.

Webinar 1: Clean Energy Virginia - Energy Efficiency

Learn about the energy efficient components of the Virginia Clean Economy Act. Specifics surrounding support for energy efficient affordable housing and Virginia’s participation in the Regional Greenhouse Gas Initiative (RGGI) will reveal the opportunities to increase economic resilience for all Virginians.

Webinar 2: Distributed Generation Solar

Get an overview of the Virginia Clean Economy Act (VCEA) and details of the distributed generation solar components. Topics include increase in net energy metering caps, opportunities for third party power purchase agreements and reduced barriers for rooftop generation solar components of 2020 legislation. In addition, presenters discuss models underway to offer solar energy financing for low to moderate income households, including shared solar at multifamily facilities.

*Due to technical difficulties, a recording of this webinar is unavailable.

Webinar 3: Energy Storage

Get a detailed review of the utility energy storage requirement within the Virginia Clean Economy Act (VCEA). Discussion surrounds the current policy landscape, existing barriers to large-scale energy storage deployment, opportunities for third party developers and how storage can bolster energy and economic resilience across Virginia.

Webinar 4: Utility Scale Solar, Onshore Wind

Learn about the ambitious renewable energy goals within the Virginia Clean Economy Act (VCEA) and associated bills that transition Virginia's energy landscape by mid-century. Utility scale solar and onshore wind components of the VCEA as well as renewable energy credits and deficiency payments will be discussed. This webinar includes an overview of state-level permitting and a breakdown of energy equity programs to ensure clean energy to all Virginians.

Webinar 5: The Virginia Advantage in Offshore Wind

Deep water, no overhead air draft, available land, prepared workforce and commitment from the state government—that is the Virginia Advantage. Listen to a conversation among offshore wind industry experts as to why Virginia is the natural choice to build America's newest renewable energy industry. Presenters: **Jennifer Palestrant**, Chief Deputy, Virginia Department of Mines Minerals and Energy; **Will Fediw**, Vice President Industry and Government Affairs, Virginia Maritime Association; **Chris Gullickson**, Director, Economic Development, The Port of Virginia; **G.T. Hollett**, Director Generation Projects for Offshore Wind, Dominion Energy; **Tommy Miller**, Senior Manager, Business Investment, Virginia Economic Development Partnership; **Eric Thumma**, Interim Vice President, Offshore Wind, Avangrid Renewables and **Hayes Framme**, Senior Government/Communications Manager, Orsted.
