§ 45.1-361.35. Objections to permits; hearing.

B. The only objections to permits or permit modifications which may be raised by surface owners are:

1. The operations plan for soil erosion and sediment control is not adequate or not effective;

2. Measures in addition to the requirement for a well's water-protection string are necessary to protect fresh water-bearing strata;

4. Location of the coalbed methane well or coalbed methane well pipeline will unreasonably infringe on the surface owner's use of the surface, provided, however, that a reasonable alternative site is available within the unit, and granting the objection will not materially impair any right contained in an agreement, valid at the time of the objection, between the surface owner and the operator or their predecessors or successors in interest.

All testimony in this conference must be relevant to objections allowed for and detailed in the Gas and Oil Act of 1990.

Date and location of Conference:
